

LIGHTWEIGHT STACKABLE HORIZONTAL DISPENSING CONTAINER

Abstract of the Disclosure

A lightweight horizontal dispensing container comprising a pallet base, a pallet cover and a three sided sleeve of plastic material extending between
5 the pallet base and the pallet cover may be stacked on top of similar pallet covers or below similar pallet bases. A rectangular frame is secured to the sleeve and defines an opening on a fourth side of the horizontal dispensing container. Dunnage provides horizontal access to parts inside the container. This container enables a horizontal dispensing container to be stacked above
10 or below conventional pallet loads.
